

## **National Cycle Extends Their SxS UTV 3D Windshield Range to the KYMCO® UXV450/700!**

**Maywood, IL** – National Cycle breaks the boundaries of windshield design by forming three-dimensional curvature into the traditionally flat SxS UTV windshield. This is accomplished without sacrificing the use of their tough Quantum® hardcoated 4.0mm polycarbonate material.

The benefits of a 3D-formed windshield are striking good looks, an optically clear cockpit view, and substantial added rigidity that is particularly noticeable in full-size windshields. Now SxS UTV owners can enjoy the same windshield clarity and wide-view optics that they experience in their pickup trucks!

The new 3D Windshields are available in a full-size front and a full-size rear for each model. An add-on Wash'n'Wipe™ Kit is available separately.

The rear windshield prevents tools, debris, or other objects from entering the cab from the cargo area, and is effective in deflecting wind turbulence from the rear. It's also produced using tough Quantum hardcoated 4.0mm polycarbonate material.
