

ZTechnik's Popular VStream+® Windscreens Now Available for the 2019 BMW R1250R

Maywood, IL – The successor to the popular R1200R is here and ZTechnik is ready with three new VStream+® Windscreens to give this naked roadster some serious touring performance. The windscreens are made in three different sizes and tints to satisfy almost any rider's needs. All will offer improved wind protection and riding comfort compared to other aftermarket windscreens.

VStream gets its name from its unique patented shape. The advanced “V” profile and dimensional contours push the wind vortex out and away from the rider's helmet, resulting in a peaceful, quieter riding environment. The “+” means these windscreens include a custom mounting bracket specifically designed and engineered for this model bike.

These windscreens are made from tough 4.5mm Quantum® hardcoated polycarbonate. This high quality material, along with state-of-the-art manufacturing techniques, provides outstanding clarity, impact strength and scratch resistance unmatched by any windscreen maker worldwide.

Quantum hardcoated polycarbonate is the material of choice for serious motorcycle riders. It is 10X more abrasion resistant than FMR hardcoated polycarbonate, and 30X more than windscreens made from commonly used acrylic or “aircraft plastic”.

VStream Windscreens are easy to install and are protected by a 3-Year Warranty against breakage!

Z2356	VStream® Sport Windscreen; Dark Tint; H: 15.75"	Retail \$359.95
