

National Cycle's Popular VStream® Windscreens for the 2020-22 Honda® CRF1100L Africa Twin

Maywood, IL – National Cycle's VStream® Windscreens for the Honda Africa Twin have been re-engineered for the 2020-22 CRF1100L standard model. Three sizes mean there is a perfectly sized windscreen for almost every rider. All will offer improved wind protection and riding comfort compared to other aftermarket windscreens.

The VStream Windscreen for the CRF1100L was extensively tested before the three sizes were determined. Riders 6 ft. or taller, for example, will want the N20072 Tall Windscreen. As always, the OEM windshield adjustments are fully maintained.

National Cycle makes VStream Windscreens from tough Quantum® hardcoated polycarbonate. This state-of-the-art material provides outstanding clarity, strength and scratch resistance unmatched by any windscreen maker worldwide.

Hardcoated polycarbonate is the material of choice for serious motorcycle riders, with impact resistance 20X greater than windscreens on the market made from commonly used acrylic or "aircraft plastic".

VStream Windscreens are easy to install and are protected by a 3-Year Warranty against breakage!

N20070	VStream® Low Windscreen; Dark Tint; H: 15.00"	Retail: \$174.95
