

ZTechnik's New Line of VStream+® Windscreens for the 2020-23 BMW® F900R

Maywood, IL – Bigger, better, faster – what's not to like? But newfound power comes with a surprising amount of windblast, so it makes sense to add a VStream Windscreen to make the ride more enjoyable. Three different sizes and tints ensure a perfect windscreen for almost every rider size or riding preference. All will offer improved wind protection and riding comfort compared to OEM or other aftermarket windscreens.

VStream gets its name from its unique patented shape. The advanced "V" profile and dimensional contours push the wind vortex out and away from the rider's helmet, resulting in a peaceful, quieter riding environment. The "+" means these windscreens include a special mounting bracket designed and engineered specifically for this model.

These windscreens are made from tough 4.5mm Quantum® hardcoated polycarbonate. This high quality material, along with state-of-the-art manufacturing techniques, provides outstanding clarity, impact strength and scratch resistance unmatched by any windscreen maker worldwide.

Quantum hardcoated polycarbonate is the material of choice for serious motorcycle riders. It is 10X more abrasion resistant than FMR hardcoated polycarbonate, and 30X more than windscreens made from commonly used acrylic or "aircraft plastic".

VStream Windscreens are easy to install and are protected by a 3-Year Warranty against breakage!

Z2389 VStream+ Low Windscreen; Dark Tint; H: 13.50"	Retail: \$274.95
