

ZTechnik Announces New GS Fairing Winglets for the Liquid Cooled BMW® R1200GS

Maywood, IL – ZTechnik's new GS Fairing Winglets raise the performance and comfort level of the 2013 and later R1200GS for both touring and off-road riders.

ZTechnik GS Fairing Winglets were recently tested off-road in the Southwestern deserts and mountains and on the open highways in Colorado, Arizona and Utah. The GS Fairing Winglets extended the performance of the bike's windshield by diverting buffeting underdrafts and turbulent air from the rider's cockpit.

The GS Fairing Winglets are fuller and higher than the small OEM Cockpit Fairing parts. In all types of riding conditions, touring and adventure riders alike will be happy to have the increased performance of ZTechnik's GS Fairing Winglets on their motorcycle.

GS Fairing Winglets mount easily to existing points on the motorcycle in less than 15 minutes. Mount screws with special offset bushings keep the plastic away from the painted bodywork of the bike. All hardware is included.

GS Fairing Winglets are made from tough 4.5mm Quantum® hardcoated polycarbonate. This material is lightweight but has the durability and scratch resistance to handle the rugged off-road environment. ZTechnik's state-of-the-art manufacturing techniques and attention to detail are evident in the smooth radius edge, precision forming, excellent fit and simple installation.

GS Fairing Winglets are compatible with ZTechnik VStream® Windscreens, OEM windscreens, and other windshields, as well as with ZTechnik's Z5220 Windscreen Stabilizer Kit and ZTechnik Headlight Guards.

Z5002 GS Fairing Winglets; Dark Tint Polycarbonate
Fits 2013-Current BMW R1200GS
Retail \$164.95
