

FOR IMMEDIATE RELEASE

## **ZTechnik® Headlight Guards for 2018 BMW® R1200GS LED Headlights**

**Maywood, IL** – All BMW GS riders want the best guard protecting their expensive headlight. While there are a number of different choices available, ZTechnik makes the best in the industry using their exclusive Quantum® hardcoated polycarbonate material. When attached, the Headlight Guard disappears from view while offering crystal clarity and indestructible protection.

ZTechnik's exclusive Quantum® hardcoating makes these polycarbonate Headlight Guards up to 30X more scratch resistant than competitive guards made with acrylic or uncoated polycarbonate, and does not produce unwanted light refraction or glare.

Like ZTechnik's Quantum hardcoated VStream® windscreens, these Headlight Guards are designed to withstand 10 years' exposure to UV and environmental hazards. And their 3mm thick polycarbonate makes them 20X more impact resistant than typical guards made with acrylic.

ZTechnik Headlight Guards follow the contours of the headlight frame. Attaching discreetly to the frame with durable marine-grade Velcro®, the guards retain a low profile while providing sufficient clearance to allow for the deflection of road debris. Installation instructions are included for easy installation. They can be quickly removed for cleaning the headlight lens or the guard itself.

Z5403 Quantum® Hardcoated Polycarbonate LED Headlight Guard; Retail \$79.95  
Fits 2018 R1200GS/GSA; Will Also Fit 2013-17 Models

ZTechnik products are made in the U.S.A.

About ZTechnik:

ZTechnik® is a brand created by National Cycle, Inc. that specializes in high quality motorcycle accessories designed exclusively for BMW Motorcycles. The name itself is from the German "Zubehör Technik," which translates to "technical accessories" in English. The ZTechnik philosophy is to closely follow design principles established by the original equipment designers, produce only the highest quality parts possible, and enhance the rider's total experience.
